## Profile

I am a Hong Kong-based multimedia designer and creative developer specializing in photography, commercial video production, web development, interactive experiences, and visual content design. My work spans brand visuals, promotional videos, web interfaces, event visuals, 3D graphics, and game-related interactive content.

## Core Skills

### Video Production

Commercials, product intros, and documentary-style storytelling from pre-production to post-editing.

### 3D & Motion

High-fidelity product rendering, abstract motion graphics, and architectural visualization.

### Web Development

Building responsive, interactive websites and web applications using modern frameworks like React.

### Photography

Professional portrait, street, and product photography capturing moments with precision.

### Games

Designing mechanics, and building immersive experiences from indie concepts to experiments.

### Graphic Design

2D visual works, digital graphics, and compositions built for branding, campaigns, and visual storytelling.

## Technical

- Sony Canon Adobe Suite Adobe Premiere Pro Adobe After Effects HiggsField
